Title

The Impact of Social Media on Academic Performance Among Undergraduate Students: A Case

Study at Harvard University

Abstract

This study investigates the influence of social media usage on the academic performance of undergraduate students at Harvard University. Employing a mixed-methods approach, the research combines quantitative surveys with qualitative interviews to explore correlations and underlying factors. Findings aim to inform university policies on digital media engagement and student well-being. The project is expected to span six months, with a proposed budget of \$5,000 to cover survey tools and transcription services.

Introduction and Background

In recent years, social media platforms have become integral to students' daily lives, offering both opportunities and challenges. While these platforms facilitate communication and information sharing, concerns have arisen regarding their impact on academic focus and performance. Harvard students, known for their rigorous academic environment, are not immune to these influences. Previous research indicates mixed results, with some studies suggesting social media can distract students, while others highlight potential benefits for collaborative learning. Despite this, there remains a significant gap in understanding how social media usage specifically affects Harvard undergraduates' academic outcomes.

Research Questions

- How does social media usage correlate with academic performance among Harvard undergraduates?
- What are students' perceptions of social media's impact on their studies?
- Are there specific social media behaviors that positively or negatively influence academic success?

Significance of the Study

Understanding the role of social media in students' academic lives can guide university policies, mental health support, and digital literacy programs. This research will contribute to the broader discourse on digital media's role in higher education, offering insights tailored to Harvard's unique academic culture.

Literature Review

Existing literature presents a nuanced view of social media's effects on students. Some studies,

such as Kuss and Griffiths (2017), link excessive social media use to lower GPA and increased distraction. Conversely, research by Greenfield et al. (2019) highlights social media’s potential for academic collaboration and peer support. However, most studies focus on general student populations; few specifically examine Harvard undergraduates. This gap underscores the need for focused research within this high-achieving demographic.

Methodology

- Research Design: Mixed-methods approach combining quantitative surveys and qualitative interviews.
- Participants: 200 undergraduate students randomly selected from Harvard’s undergraduate population.
- Data Collection:
 - Online surveys measuring social media habits, study habits, and academic performance.
 - Semi-structured interviews with 20 students for in-depth insights.
- Analysis:
 - Statistical analysis (correlation and regression) of survey data.
 - Thematic analysis of interview transcripts.
- Ethical Considerations: Informed consent will be obtained; participant anonymity will be maintained.

Timeline

Phase	Activity	Duration
-----	-----	-----
Month 1	Literature review, proposal approval	1 month
Month 2	Survey design and pilot testing	1 month
Months 3-4	Data collection	2 months
Month 5	Data analysis	1 month
Month 6	Report writing and dissemination	1 month

Budget

- Survey tools and software: \$1,500
- Transcription services: \$2,000
- Miscellaneous expenses (printing, incentives): \$1,500
- Total: \$5,000
