

GOOGLE MAP FOR NOKIA ASHA 110 Academic PDF

Google Map for Nokia Asha 110

In today's digital age, navigation and location-based services are essential tools for both everyday commuting and exploring new places. For users of budget-friendly smartphones like the Nokia Asha 110, accessing reliable maps and navigation apps can significantly enhance their mobile experience. Although the Nokia Asha 110 is a feature phone with limited capabilities compared to smartphones, many users still seek ways to access Google Maps or similar services for navigation purposes. This article provides a comprehensive guide to understanding the possibility of using Google Maps on the Nokia Asha 110, alternative options, and practical tips to maximize your device's navigation potential.

Understanding the Nokia Asha 110

The Nokia Asha 110 is part of Nokia's Asha series, launched primarily to provide affordable feature phones with basic internet and multimedia features. Here are some key features of the Nokia Asha 110:

- Display: 1.8-inch QQVGA (160x120 pixels) screen
- Operating System: Nokia Series 30+ OS
- Connectivity: 2G GSM networks, Bluetooth, Micro USB
- Battery Life: Up to 14 hours talk time
- Camera: No camera
- Storage: Limited internal storage, no expandable memory
- Internet Access: Basic, via Opera Mini or Nokia Xpress Browser

Given its hardware and software limitations, running modern apps like Google Maps directly on the Nokia Asha 110 is not feasible. The device lacks the necessary processing power, screen resolution, and operating system support for installing Android apps or other smartphone-based navigation apps.

Can You Use Google Maps on Nokia Asha 110?

Official Support and Limitations

Google Maps is designed primarily for Android and iOS devices, requiring a smartphone operating system that supports app installation and internet browsing capabilities. Since Nokia Asha 110 runs on Nokia's Series 30+ OS, it does not support the installation of Android apps or Java-based applications that Google Maps would require.

Key limitations include:

- No access to Google Play Store or any app marketplace
- Inability to install Java or Symbian-based apps (if supported)
- Limited internet browsing capabilities via Opera Mini or Nokia Xpress Browser, which are not optimized for complex map services

Conclusion:

You cannot directly install or run Google Maps on the Nokia Asha 110 due to hardware and software constraints.

Alternative Methods to Access Navigation on Nokia Asha 110

Although direct use of Google Maps isn't possible, there are alternative methods and tools to help you navigate and access map data with your Nokia Asha 110.

1. Use Mobile Web Browsers with Simplified Map Services

While the device's browser is limited, you can attempt to access lightweight web versions of map services.

Steps:

- Open Opera Mini or Nokia Xpress Browser
- Navigate to mobile-friendly map websites such as:
 - m.google.com/maps (may be limited)
 - Alternative lightweight map sites like [here.com](https://www.here.com/)
 - [MapQuest Mobile](https://mobile.mapquest.com/)

Limitations:

- Slow loading times

- Limited interactivity
- No turn-by-turn navigation
- Small screen size hampers usability

Tip: Use the zoom and pan features carefully for basic location awareness.

2. Use SMS-Based Location Services

Some services allow sending SMS messages to get location info or directions.

Examples include:

- Sending a location request via SMS to a supported service (if available)
- Using carrier-based location sharing features (check with your network provider)

Note: Availability varies and may incur charges.

3. Pair with a Smartphone for Navigation

If you own a smartphone alongside your Nokia Asha 110, consider pairing the two devices to leverage smartphone navigation.

Options:

- Use Bluetooth to transfer location data
- Use the smartphone for navigation while using the Nokia Asha 110 for calls or basic communication

4. Upgrade to a Smartphone with Google Maps Support

If navigation is a priority, upgrading to an entry-level Android smartphone will provide full access to Google Maps and other navigation apps.

Using Basic GPS Devices and Offline Maps

For those unable to access internet-based maps, offline GPS devices or dedicated GPS units can serve as alternatives.

1. Offline Maps on Smartphones

Modern smartphones allow downloading offline maps for navigation without continuous internet access.

How to do it:

- Use a compatible device (Android/iOS)
- Download maps of your area in Google Maps or other apps like Maps.me
- Use the offline maps for navigation

2. Dedicated GPS Devices

Devices like Garmin or TomTom provide offline navigation capabilities without relying on smartphones.

Advantages:

- No internet required
- Turn-by-turn voice navigation
- Durable and battery-efficient

Practical Tips for Navigation with Nokia Asha 110

While the Nokia Asha 110 cannot run modern map apps, here are some practical tips to enhance your navigation experience:

- Plan routes manually: Use paper maps or printout of online maps for basic navigation.
- Use SMS and call services: Ask locals or use carrier services for directions.
- Leverage community-based services: Check if local businesses or landmarks provide GPS coordinates or directions.
- Keep your device charged: Navigation can drain battery; ensure your device is charged before traveling.
- Consider upgrading hardware: For regular navigation needs, consider investing in a dedicated GPS device or a smartphone.

Conclusion

In summary, the **Google Map for Nokia Asha 110** does not exist due to the device's hardware and software limitations. The Nokia Asha 110 is designed for basic communication and multimedia

functions, and does not support the installation of modern navigation apps like Google Maps.

However, users can still access basic map and navigation features through alternative methods such as mobile web browsers, SMS-based location services, or pairing with a smartphone that supports Google Maps. For more reliable, full-featured navigation, upgrading to a smartphone with Android or iOS is highly recommended.

By understanding the capabilities and limitations of the Nokia Asha 110, users can make informed decisions about their navigation needs and explore suitable alternatives that fit their budget and device capabilities.

Google Map for Nokia Asha 110: Navigating the Future on a Classic Device

Google Map for Nokia Asha 110 is a topic that sparks curiosity among mobile users who cherish the simplicity of feature phones yet desire the convenience of modern navigation tools. The Nokia Asha 110, a basic mobile device launched in the early 2010s, was designed with affordability and durability in mind. While it doesn't boast the advanced hardware or operating system capabilities of smartphones, many users still seek ways to access essential services like maps and navigation. This article explores the possibilities, challenges, and solutions for using Google Maps or similar navigation tools on the Nokia Asha 110, providing a comprehensive guide for enthusiasts and casual users alike.

Understanding the Nokia Asha 110: Features and Limitations

Before diving into the specifics of Google Maps compatibility, it's important to understand what the Nokia Asha 110 offers and what constraints it presents for navigation.

Hardware Overview

- Display: 1.8-inch QVGA display with a resolution of 128x160 pixels.
- Processor: Single-core processor optimized for basic functions.
- Memory: 64MB RAM and 128MB internal storage.
- Connectivity: 2G GSM network support, Bluetooth, and micro-USB port.
- Operating System: Proprietary Nokia Series 30+ OS.
- Battery: Long-lasting battery with up to 14 hours talk time.

Limitations for Navigation

The Nokia Asha 110 was built without the advanced hardware or OS capabilities needed to run modern smartphone apps. Specifically:

- No touchscreen interface: Navigation apps designed for touchscreens are incompatible.
- Limited processing power: Complex map rendering and real-time GPS tracking are impossible.
- Lack of GPS Module: The device does not have built-in GPS hardware.
- Unsupported app environments: Cannot install Android or iOS apps, and the Series 30+ OS does not support Java-based apps that require GPS.

Given these limitations, using Google Maps directly on the Nokia Asha 110 is not feasible. However, alternative methods can help users access navigation services or approximate their location.

Exploring Alternative Navigation Solutions for Nokia Asha 110

Since direct installation of Google Maps or similar apps is impossible on the Nokia Asha 110, users need to explore alternative methods to benefit from navigation features.

- Using Mobile Web Browsers for Web-Based Maps

Although the device's browser is basic, it may support limited web browsing capabilities:

- Check browser compatibility: Test if the built-in browser can access mobile versions of map services.
- Access simplified map sites: Use lightweight, mobile-optimized web maps like Google Maps Mobile (if supported), or alternative sites.

Limitations:

- Small screen size hampers usability.
- Limited data support and slow browsing over 2G networks.
- No real-time GPS tracking; only static map viewing.

- SMS-Based Location Sharing

Some services and carriers offered SMS-based location sharing in the early 2010s:

- How it works: Send a text message to a service number, which responds with location details.
- Limitations: Requires prior setup, network support, and recipient's cooperation.

- Using Bluetooth or Micro-USB for Data Transfer

For users with companion smartphones:

- Sync data: Share location data or maps from a smartphone to the Nokia Asha 110 via Bluetooth or USB.
- Limitations: Manual process, not real-time navigation.

- Dedicated GPS Devices

Since the Nokia Asha 110 lacks GPS hardware, investing in a dedicated GPS navigation device is an option for offline navigation.

The Promise and Challenges of Installing Apps on Nokia Asha 110

Some tech enthusiasts have explored unofficial methods to extend their device functionalities, but these come with caveats.

Installing Java-Based Navigation Apps

- The Series 30+ OS does not support Java apps, limiting this option.
- Some Nokia feature phones running Series 40 or Series 60 OS could support Java apps, but the Asha 110's platform is incompatible.

Modding the Device

- Custom firmware or hacking: Risky and often voids warranty.
- Feasibility: Limited due to hardware constraints and OS restrictions.

Practical Tips for Navigating with Nokia Asha 110

While the device can't run Google Maps directly, users can adopt several practical strategies:

- Pre-Download Maps on a Smartphone: Use a smartphone to download offline maps of your area, then transfer images or PDFs to your Nokia Asha 110 for reference.
- Use Paper Maps: Classic but reliable, especially in areas with poor network coverage.
- Leverage Local Knowledge: Carry local guides or ask for directions.
- Use SMS or Call Services: Many local services provide location updates via SMS.

Future Prospects and Recommendations

As technology advances, the gap between feature phones like the Nokia Asha 110 and smartphones widens. For users seeking seamless navigation experiences, upgrading to a smartphone remains the most straightforward solution.

Recommendations:

- Upgrade to a Smartphone: Devices running Android or iOS support Google Maps and other navigation apps.
- Use Entry-Level Smartphones: Affordable models offer GPS, internet access, and app support.
- Keep Offline Maps Ready: Download maps beforehand for areas with limited connectivity.
- Stay Informed: Newer feature phones with KaiOS (like the Nokia 6300 4G) support apps like Google Maps, providing a middle ground.

Conclusion

Google Map for Nokia Asha 110 remains a challenging proposition due to the device's hardware and software limitations. While direct installation and real-time navigation are impossible, users can still access rudimentary map data via web browsers, utilize SMS-based location services, or rely on traditional navigation tools. As mobile technology continues to evolve, embracing a more capable device is the most effective way to enjoy full-fledged navigation services. For those committed to their Nokia Asha 110, understanding its constraints and leveraging alternative methods can still offer

meaningful assistance in navigating the world around them, even if not in the high-tech manner modern smartphones do.

QuestionAnswer Is Google Maps available for Nokia Asha 110? No, Google Maps is not officially available for Nokia Asha 110 as it runs on the Series 30 platform, which does not support Java or Android apps like Google Maps. Are there any alternative navigation apps for Nokia Asha 110? Yes, you can use lightweight browser-based map services like Opera Mini to access mobile-friendly map websites or explore other compatible navigation apps designed for feature phones. Can I use GPS features on Nokia Asha 110? Nokia Asha 110 lacks built-in GPS hardware, so it cannot support GPS-based navigation or Google Maps location features. How can I access maps or directions on Nokia Asha 110? You can access maps and directions by opening the browser on your Nokia Asha 110 and visiting mobile map websites like Bing Maps or other web-based navigation services compatible with the device. Is there a way to install Google Maps on Nokia Asha 110? No, since the device does not support Java or Android apps, installing Google Maps is not possible on Nokia Asha 110. What are some tips for navigation on Nokia Asha 110? Use mobile web browser to access simple map services, keep data connection active, and consider offline maps or downloaded routes if available through compatible apps or services. Are there any third-party apps that can provide map navigation on Nokia Asha 110? Most third-party apps for map navigation require Java support, which Nokia Asha 110 does not have. Therefore, options are very limited, and web-based maps are your best choice.

Nokia asha 305 wifi app

nokia asha 305 wifi app: A Complete Guide to Enhancing Your Nokia Asha 305 Experience

If you're a proud owner of the Nokia Asha 305 and looking to expand its capabilities, especially in terms of internet connectivity, you might be curious about the possibilities surrounding the **Nokia Asha 305 WiFi app**. While the Nokia Asha 305 is primarily designed as a feature phone with limited smart capabilities, there are ways to enhance its internet access, improve browsing experiences, and explore compatible applications. This comprehensive guide will walk you through everything you need to know about WiFi connectivity on the Nokia Asha 305, including app options, setup instructions, troubleshooting, and tips for optimizing your online experience.

Understanding the Nokia Asha 305 and Its Connectivity Options

Before diving into WiFi apps and solutions, it's important to understand the device's basic capabilities.

Device Overview

The Nokia Asha 305 is a budget-friendly feature phone launched by Nokia, primarily aimed at users seeking basic mobile functions with some internet capabilities. It features:

- Single SIM card support
- 3-inch resistive touchscreen display
- Bluetooth connectivity
- GSM 850/900/1800/1900 MHz support
- No native WiFi support

Connectivity Limitations

Unlike smartphones, the Nokia Asha 305 does not come with built-in WiFi functionality. It relies on cellular data (2G network) for internet access, which can be limited in speed and coverage.

Can You Use WiFi on Nokia Asha 305?

Given its hardware specifications, the Nokia Asha 305 does not support WiFi connectivity natively. This means:

- There's no built-in WiFi hardware in the device.
- You cannot install a WiFi app to add WiFi capabilities.
- Internet access is limited to cellular data plans via GPRS/EDGE networks.

However, there are alternative methods to connect your Nokia Asha 305 to the internet more efficiently, which we will explore next.

Alternative Methods to Improve Internet Access on Nokia Asha 305

Since WiFi is not supported, you can consider these options:

1. Tethering via a Smartphone

If you own a smartphone with WiFi or mobile hotspot capabilities, you can share its internet connection with your Nokia Asha 305 through Bluetooth or USB tethering.

- **Bluetooth Tethering:** Pair your phone with the Asha 305 via Bluetooth and share internet access.
- **USB Tethering:** Connect your phone to the Asha using a compatible USB cable and enable tethering on your phone.

2. Using a Mobile Hotspot Device

Invest in a portable WiFi hotspot device that provides internet via cellular networks. Connect your Nokia Asha 305 to this device through Bluetooth or GPRS, if supported.

3. Upgrading to a Smartphone

For seamless WiFi access and app support, consider upgrading to a smartphone that supports WiFi and has access to app stores like Google Play or Apple App Store.

Exploring Apps to Enhance Internet Usage on Nokia Asha 305

Although the Nokia Asha 305 runs on the Series 40 platform, it supports Java-based apps (J2ME). You can install certain Java apps to improve your browsing or add useful features.

Supported Applications and How to Install Them

Here's a list of popular apps and tools compatible with the Nokia Asha 305:

- **Opera Mini Browser:** A lightweight browser optimized for feature phones, offering faster browsing and data compression.
- **UC Browser:** Another popular browser with data saving features suitable for low-end devices.
- **Facebook Java App:** For social media access without using the browser.
- **WhatsApp Java:** Messaging app for staying connected (availability varies, check compatibility).

How to Install Java Apps

To install apps on your Nokia Asha 305:

- Download the app's JAR file from a trusted source onto your computer.
- Transfer the JAR file to your phone via Bluetooth or a compatible memory card reader.
- On your device, open the file manager and locate the JAR file.
- Select the file to initiate installation.
- Follow on-screen prompts to complete installation.

Optimizing Internet Use on Nokia Asha 305

Since the device relies on cellular data, optimizing your internet experience involves managing data and browser settings efficiently.

Tips for Better Browsing

- **Use Data Compression Browsers:** Opera Mini and UC Browser use compression to reduce data usage and improve load times.
- **Disable Images and Scripts:** In browser settings, turn off images or scripts to speed up loading and save data.
- **Clear Browser Cache Regularly:** This prevents slowdowns caused by accumulated cache data.
- **Limit Background Data Usage:** Avoid running multiple apps that consume data simultaneously.

Managing Data Costs

- Choose a data plan that fits your usage to avoid unexpected charges.
- Monitor your data consumption regularly.
- Turn off cellular data when not in use.

Security and Privacy Considerations

When using internet apps and sharing connections, security should be a priority.

Best Practices

- Use secure Bluetooth pairing and avoid pairing with unknown devices.
- Keep your device's software updated, if updates are available.
- Be cautious when downloading apps from unofficial sources to avoid malware.
- Disable Bluetooth when not in use to prevent unauthorized access.

Conclusion: Maximizing Your Nokia Asha 305's Internet Capabilities

While the Nokia Asha 305 does not natively support WiFi or WiFi apps, you can still enjoy internet access through alternative methods like Bluetooth tethering or mobile hotspots. Installing Java-based browsers like Opera Mini or UC Browser can significantly improve your browsing

experience on this device. Remember to manage your data usage carefully and prioritize security when sharing connections or downloading apps.

If staying connected and browsing efficiently is a priority, consider upgrading to a smartphone with native WiFi support and access to app stores. However, for basic internet needs, the Nokia Asha 305, combined with the right accessories and apps, can serve you well.

Nokia Asha 305 WiFi App: Unlocking Wireless Connectivity on a Classic Feature Phone

The Nokia Asha 305 WiFi app represents an intriguing development in the realm of feature phones, blending traditional mobile design with the modern convenience of wireless connectivity. Although the Nokia Asha 305 is primarily recognized for its affordable price point, durable build, and straightforward user interface, the addition of WiFi capability enabled through specialized apps opens up new avenues for users seeking internet access without relying solely on 3G networks or mobile data plans. In this comprehensive guide, we explore what the Nokia Asha 305 WiFi app entails, how it functions, and what users need to know to maximize their experience.

Understanding the Nokia Asha 305: A Brief Overview

Before diving into the specifics of the WiFi app, it's essential to understand the device's core features and limitations. The Nokia Asha 305 was released in 2012 as part of Nokia's Asha series, aimed at providing affordable smartphones with smart features. Its key specifications include:

- Display: 3-inch resistive touchscreen, 240 x 320 pixels
- Operating System: Nokia Series 40 Asha platform
- Processor: 1 GHz single-core processor
- Memory: 64 MB RAM, 32 MB internal storage (expandable via microSD)
- Connectivity: 2G (GSM), Bluetooth 3.0, microUSB
- Camera: 2 MP rear camera
- Battery: Up to 6 hours talk time

While the device does not natively support WiFi, users can leverage certain apps and configurations to enable WiFi access, expanding its use cases beyond traditional calls and SMS.

The Concept of WiFi Apps on Nokia Asha 305

Unlike smartphones with integrated WiFi modules, feature phones like the Nokia Asha 305 lack built-in WiFi hardware. However, through innovative methods?such as using third-party apps, firmware modifications, or tethering features?users have attempted to bridge this gap.

Key points about WiFi on Nokia Asha 305:

- The device does not have native WiFi hardware; thus, any WiFi app is often a misnomer or refers to methods of sharing internet rather than directly connecting to WiFi networks.
- Some apps or tools enable tethering or internet sharing, turning the device into a WiFi hotspot.
- Users can also connect the phone to other WiFi-enabled devices via Bluetooth or USB tethering, depending on the support.

How to Enable WiFi-Like Functionality on Nokia Asha 305

Given the hardware constraints, the most practical way to utilize WiFi on the Nokia Asha 305 involves tethering or internet sharing. Here's a step-by-step guide:

- Using Bluetooth Tethering

While the Asha 305 does not support WiFi hotspot creation, it can share its 2G internet connection via Bluetooth with compatible devices.

Steps:

- Pair the Nokia Asha 305 with your computer or tablet via Bluetooth.
- On the Nokia Asha 305, navigate to Settings > Connectivity > Bluetooth.
- Enable Bluetooth and set device visibility to On.
- On your computer, pair with the Asha device.
- Once paired, go to Settings > Connectivity > Bluetooth > Internet Sharing.
- Enable Bluetooth Tethering.
- On your PC or tablet, select the Asha device as a network source, and configure as needed.

Limitations:

- Slow data transfer rates.
- Limited to basic internet use.

- Using USB Tethering

If your computer recognizes the Nokia Asha 305 as a modem via USB, you can share the device's mobile data connection.

Steps:

- Connect the phone to your PC via microUSB cable.
- On the Asha, go to Settings > Connectivity > USB.
- Enable USB Tethering.
- Your computer should detect a new network connection, allowing internet access.

Note: This method relies on the device's ability to act as a modem, which may be limited on the Nokia Asha platform.

Third-Party Apps and Firmware Modifications

Unlike smartphones, feature phones like the Nokia Asha 305 do not support installing apps from app stores like Google Play or the Nokia Store in the same way. However, enthusiasts have explored:

- Custom firmware or firmware hacks that enable additional features.
- Java-based apps that can facilitate tethering or network sharing.

Caution: Modifying firmware can void warranties and pose security risks. Proceed only if you have technical expertise and understand the risks involved.

Practical Uses of WiFi or Internet Sharing on Nokia Asha 305

Once configured for tethering or sharing, the Nokia Asha 305 can serve various purposes:

- Internet Browsing: Access basic websites on a connected device.
- Email and Messaging: Use apps that support email or social media via internet sharing.
- Offline Data Sharing: Transfer files between devices using Bluetooth or microSD.

Limitations and Challenges

While setting up WiFi-like functionality on the Nokia Asha 305 can be beneficial, users must be aware of certain limitations:

- Hardware restrictions: No native WiFi hardware.
- Slow speeds: GPRS or 2G networks are slow compared to modern standards.
- Battery drain: Tethering can significantly reduce battery life.
- Compatibility issues: Not all devices or OS versions may support tethering via Bluetooth or USB.
- Security: Bluetooth tethering can be less secure, so proper pairing and security settings are essential.

Alternatives to WiFi Apps for Nokia Asha 305

If your primary goal is internet access, consider these options:

- Using Mobile Data: Rely on the device's 2G connection for basic browsing.
- Connecting via Bluetooth or USB to another device with WiFi: Use the Asha to share internet with a computer or tablet.
- Upgrading to a Smartphone: For seamless WiFi experience, consider a smartphone with native WiFi and internet sharing capabilities.

Final Thoughts: Is a Nokia Asha 305 WiFi app Practical?

Given the hardware limitations, the concept of a dedicated WiFi app for the Nokia Asha 305 is somewhat of a misnomer. Instead, users should focus on utilizing tethering options like Bluetooth and USB to share the device's internet connection with other devices. While this approach doesn't turn the Asha 305 into a WiFi hotspot in the conventional sense, it provides a workaround for basic internet sharing needs.

For users seeking a more straightforward wireless internet experience, investing in a device with native WiFi capabilities is advisable. However, for nostalgic users or those committed to the Asha platform, understanding these methods can extend the utility of their device.

Summary Checklist

- The Nokia Asha 305 does not have native WiFi hardware.
- Internet sharing is possible via Bluetooth tethering and USB tethering.

- Third-party apps or firmware modifications are limited and risky.
- Ensure your mobile data plan supports tethering.
- Use secure pairing and connection practices to protect your data.
- For seamless WiFi, consider upgrading to a smartphone with built-in WiFi support.

In conclusion, while the Nokia Asha 305 WiFi app may not exist in the traditional sense, exploring tethering options and understanding device capabilities can help you make the most of your feature phone's connectivity options. Whether for basic browsing, sharing internet with other devices, or simply experimenting with mobile tech, these methods provide a practical approach to wireless connectivity on a classic device.

QuestionAnswer Can I use WiFi apps on the Nokia Asha 305? No, the Nokia Asha 305 does not support WiFi or WiFi-based apps as it lacks WiFi connectivity features. Is it possible to connect the Nokia Asha 305 to WiFi networks? No, the Nokia Asha 305 does not have WiFi capability, so it cannot connect to WiFi networks. Are there any third-party apps to enable WiFi on the Nokia Asha 305? No, since the device does not support WiFi hardware, third-party apps cannot enable WiFi functionality on the Nokia Asha 305. Can I browse the internet on Nokia Asha 305 using WiFi? No, browsing the internet via WiFi is not possible on the Nokia Asha 305 due to the absence of WiFi support. Does the Nokia Asha 305 support any apps that require WiFi connection? No, apps that require WiFi cannot be used on the Nokia Asha 305 as it does not have WiFi connectivity. What connectivity options does the Nokia Asha 305 offer? The Nokia Asha 305 primarily supports 2G GSM networks and Bluetooth connectivity, but does not support WiFi. Can I transfer files from a WiFi-enabled device to Nokia Asha 305? File transfers can only be done via Bluetooth or USB; WiFi transfer is not supported on the Nokia Asha 305. Are there any updates that add WiFi functionality to the Nokia Asha 305? No, firmware updates for the Nokia Asha 305 do not add WiFi support as the hardware does not support it. What are the best internet options for the Nokia Asha 305? The best internet options are using GPRS or 2G networks; WiFi is not available on this device. Is there a way to use WiFi apps on Nokia Asha 305 via tethering? Tethering requires a device with WiFi support; since the Nokia Asha 305 lacks WiFi, it cannot be used as a WiFi hotspot for apps.
